The Maryland & Delaware Railroad (M&D RR) proposes to create a truck turnaround on the site of an early-twentieth-century cannery in Carrville, Maryland. The cannery was demolished, probably in the 1960s or 1970s, and all that remains are several cast concrete piers and broken pieces of concrete slab. Most of the site was bulldozed and cleared, possibly around the time of the abandonment of the cannery. The remnant piers are located in two clusters; one approximately 25' by 25' is located within the limits of the Project Area. The second cluster of piers is located to the north of the Project Area and is approximately 40' x 30'. Both clusters are in wooded areas. A broken concrete surface is also located within the project area. The canning industry has been important in Maryland history since the 19th century, and there are extant sites that are better suited to the study of this economic activity. The Eastern Shore contains numerous active and abandoned canneries that retain integrity. The Carville site lacks integrity, and therefore there is low potential for the site to yield information on Maryland canneries. The site is recommended as not eligible for listing in the state or national registers. No additional cultural resources work is warranted.
